THE PURITY SYSTEM

Professional Manual

PROCEUTIC

**ABOVE
AESTHETICS**

Proceutic is the innovative **dermaceutical line** designed by Bioline Jatò laboratories and formulated to be safe and effective for both men and women.

The main features of the Proceutic line are:

EFFECTIVENESS	TOLERABILITY	SAFETY
Latest-generation functional substances combined with targeted action mechanisms represent maximum evolution in treatments targeted to aged and impure-seborrheic skin.	All products are fragrance-free, preservative-free*, mineral oil-free, colorant-free and silicone-free.	All the formulations are clinically tested and require rigorous application protocols and a certified training programme.

A jump towards a cosmetics that aim not only at effectiveness, but also at **dermo-compatibility**.

*Preservatives: substances in Annex V of Regulation (EC) No 1223/2009 on cosmetic products

Over **40 years of experience in cosmetic research and formulation** are the strengths of the Proceutic line, which focuses on recurrent themes that have never been so effectively addressed in cosmetics: skin aging, dark spots, and seborrheic and asphyxiated skin with possible acne evolution.

This line is ideal as a preparation, accompaniment, or alternating with dermo-cosmetic treatments that offer **safe and concrete answers** to the skin's real beauty needs.

Highly performing cosmetic formulas, high concentrations of active substances and rigorous application protocols within

the exclusive **Bioline Jatò ® System method** open new prospects in the field of dermaceuticals.

Bioline Jatò offers its employees and customers a **training programme** that includes lessons, meetings, and workshops to discuss the latest scientific and technological developments in the beauty industry. Moreover, the possibility of participating in training for the Bioline Jatò ® System with innovative and exclusive protocols allows the effectiveness of the aesthetic and dermaceutical treatments to be maximized.

PROCEUTIC

Scientific research
and innovation

Professionalism
and rigorous protocols

Dermo-compatibility
and effective formulas

Research and innovation for cutting-edge cosmetics

Technology, in-depth studies and expertise in formulas are the elements that allowed Bioline Jatò laboratories to select the safest and most performing functional substances.

REBALANCING THE SKIN MICROBIOTA

Prebiotics

INULIN, ALPHA-GLUCAN OLIGOSACCHARIDE

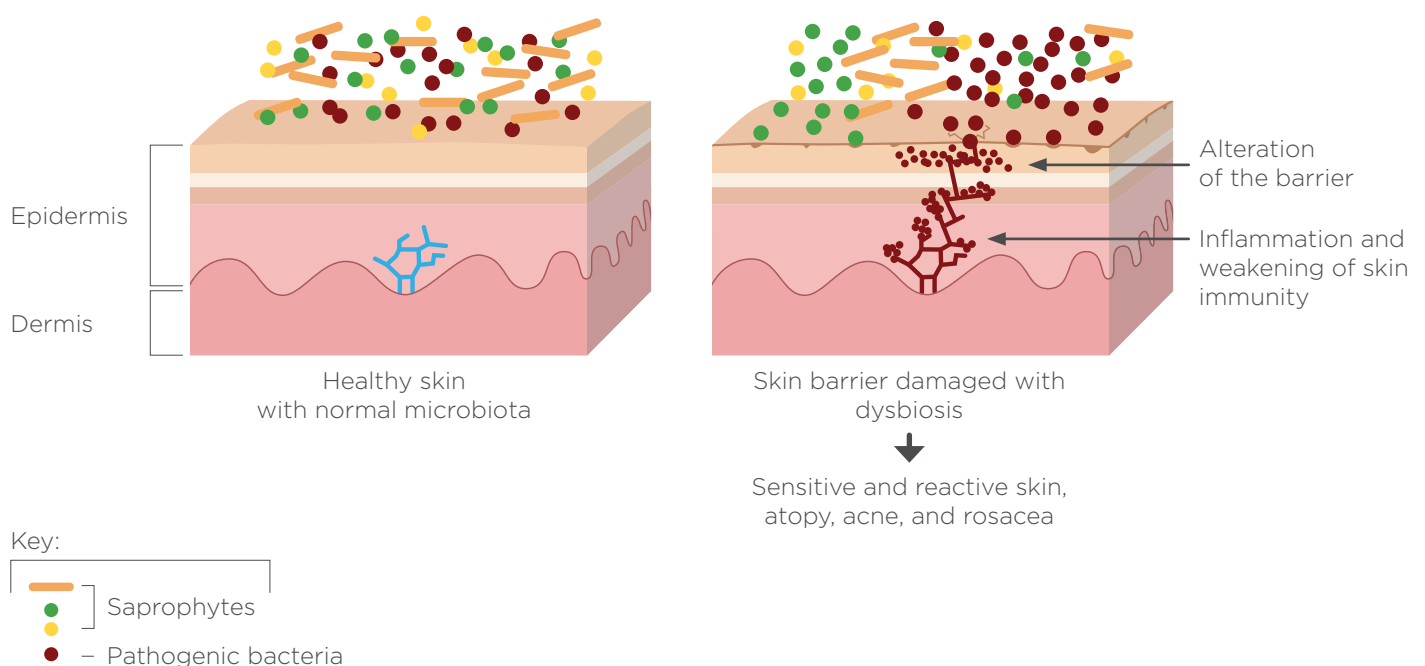

Recent scientific progress has led to **better knowledge of the skin microbiota**, which is the set of microorganisms, bacteria, viruses, and fungi that live on and interact with the skin to ensure its proper function.

In general, the more balanced and diversified the microbiota, the healthier the skin (1)*.

Various studies show that an **unbalanced microbiota** (dysbiosis) can alter the skin's barrier function, causing aging and conditions such as acne, atopic dermatitis, and rosacea.

Therefore, the use of **Prebiotics** is the new frontier to cross in order to have a balanced microbiota (2)*.

Inulin extracted from Chicory root (*Cichorium Intybus*) and Alpha-Glucan Oligosaccharide obtained by enzymatic synthesis from vegetal source are the nutrients that stimulate the growth and activity of saprophytic flora, preserving skin health and beauty.

PROTECTION AGAINST BLUE LIGHT

Vitamin C 2.0

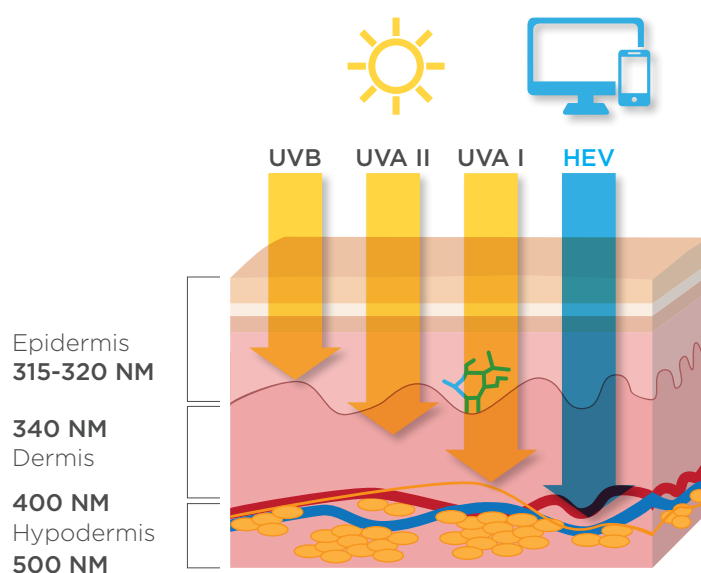

ETHYL ASCORBIC ACID

Blue light or HEV (High Energy Visible) light is a natural component of solar radiation that is part of visible light. Not only is it emitted by the sun, but also by **digital devices** such as smartphones, tablets, PCs, and LED screens, to which we are continuously exposed.

Recent scientific studies show a connection between blue light and premature aging of the skin. In fact, it induces oxidative stress with the formation of **free radicals**, causing a weakening of the skin barrier, hyperpigmentation, wrinkles, and skin laxity (3)* (4)* (5)*.

Vitamin C 2.0 is the **latest-generation** of Vitamin C that protects the skin from the harmful effects of blue light and UV rays, minimizing the visibility of signs related to digital aging and photo aging. Plus, thanks to the **powerful antioxidant activity**, it carries out an anti-pollution, brightening, and collagen-booster activity (6)*.

This formula defends the skin from the complex system of environmental agents that can damage it, creating a **360° shield** which also protects it from the harmful effects of blue light.

Mature skin with deep wrinkles and dark spots

The skin aging process is the result of **morphofunctional modifications** that involve all structures **of the skin**. The thickness of the epidermis and of the stratum corneum changes, the dermoepidermal junction flattens and the dermis thins and loses its density.

THE AGEBIOTIC SYSTEM

The Agebiotic System is the system created by Bioline Jatò which consists of professional treatments combined with targeted home cosmetic products. It is an **innovative solution** for skin with advanced aging and **heavy accentuation of linear and glyphic wrinkles**, particularly marked orbicular wrinkles of the mouth and melanic **dark spots** from exposure to light.

Clinically tested effectiveness*

RESULTS OF THE CLINICAL AND INSTRUMENTAL MEASUREMENTS PERFORMED ON VOLUNTEERS **

VOLUME OF WRINKLES AROUND THE EYES	up to -33 % average -16 %
VOLUME OF FROWN LINES	up to -28 % average -15 %
VOLUME OF WRINKLES AROUND THE LIPS	up to -26 % average -11 %

PERCENTAGE OF VOLUNTEERS WITH VISIBLE REDUCTION OF WRINKLES/DARK SPOTS EVALUATED BY A DERMATOLOGIST **

REDUCED VISIBILITY OF WRINKLES AROUND THE EYES	70 %
REDUCED VISIBILITY OF WRINKLES AROUND THE LIPS	50 %
REDUCED VISIBILITY OF DARK SPOTS	50 %

PERCENTAGE OF VOLUNTEERS WHO EXPRESSED A POSITIVE OPINION THROUGH SELF-ASSESSMENT QUESTIONNAIRE **

100 %	REDUCED VISIBILITY OF WRINKLES AROUND THE EYES
90 %	REDUCED VISIBILITY OF WRINKLES AROUND THE LIPS
95 %	REDUCED VISIBILITY OF NASOLABIAL FOLDS
90 %	REDUCED VISIBILITY OF FOREHEAD WRINKLES
100 %	MORE COMPACT SKIN
100 %	SMOOTHER SKIN
100 %	MORE LUMINOUS SKIN

* Clinical test by an independent laboratory in cooperation with Pavia University. Professional and home products tested: PROCEUTIC Clean Biotic Face & Eyes delicate cleanser, Peptide Peel exfoliating fluid, Retinoid Booster peel-off mask, After Peel neutralizing butter, Sos Recovery cream, Agebiotic serum, Agebiotic cream.

** Clinical results on tests conducted on 20 volunteers, aged 40 to 70, with wrinkles for a 6-week period (professional treatment and retail products). The instrumental measurements were obtained evaluating the wrinkle volume instead of wrinkle depth to highlight the 3D effect (depth, length, ...) of PROCEUTIC The Agebiotic System.

Functional Substances

Biotech Filler

DISODIUM ACETYL GLUCOSAMINE PHOSPHATE

Skin cells synthesise **GAGs** (glycosaminoglycans), including hyaluronic acid, from the sugar N-acetylglucosamine-6-phosphate (NAG6P). Biotech Filler is a concentrated form of NAG6P obtained through an innovative green chemical **biotechnological process**.

An exclusive source of constructive skin elements, Biotech Filler nourishes the skin cells, stimulates their regeneration, and promotes the production of **GAGs**.

GAGs: glycosaminoglycans are skin structure polymers that very easily bind with water molecules. They regulate moisture, contributing to maintaining skin elasticity.

Retinoids

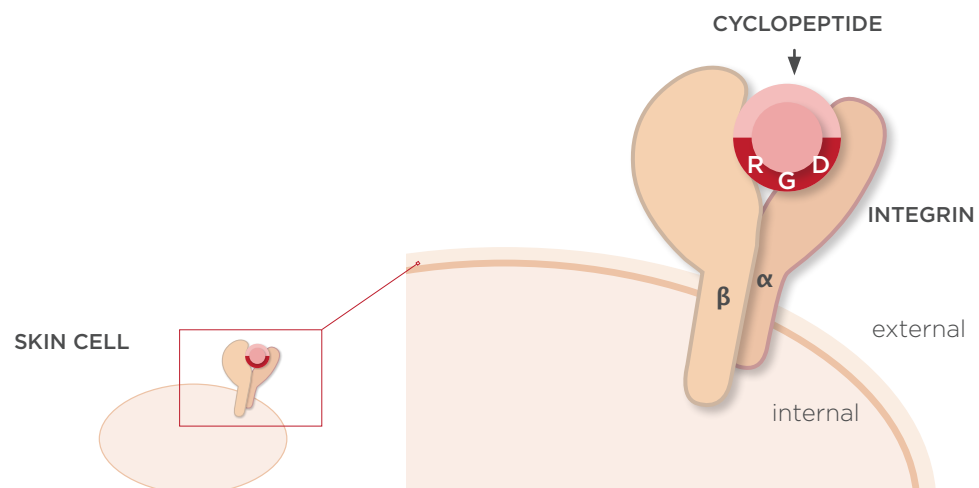

Retinoids are derivatives of Vitamin A. Among these, **Retinol and Retinaldehyde** represent an effective yet delicate alternative to retinoic acid, which is commonly used in dermatology. When applied to the skin, Retinol is converted into Retinaldehyde and then into retinoic acid (7)* (8)*.

In the PROCEUTIC line, Bioline Jatò uses Retinaldehyde, which is stabilised thanks to advanced **encapsulation technology** that allows a gradual release in the skin. The Retinol and Retinaldehyde action is further reinforced by **Bio-retinol**, an extract of the tropical plant *Bidens Pilosa* that imitates the beneficial effects of Retinoids, visibly reducing wrinkles and expression lines.

Cyclopeptide-5

Cyclopeptide-5 is a **new generation peptide** with a cyclical structure that makes it different from traditional linear peptides. Thanks to this characteristic, it is highly selective to specific skin receptors. It links to **integrins**, mimicking the natural skin communication and repair process. The skin acquires greater **elasticity** and becomes more **compact**, with visible wrinkle reduction.

Integrins: cell receptors that allow the cells to link to the extracellular matrix (ECM), also ensuring communication between the ECM and the inside of the cells, regulating different cellular functions.

Impure and seborrheic skin, prone to acne

Impure and seborrheic skin

is characterized by noticeable oiliness, the presence of open comedones, and possible local inflammations with papules/pustules. **Asphyxiated skin**, despite being dry on the surface and rough to the touch, has open and closed comedones.

THE PURITY SYSTEM

The Purity System is the system created by Bioline Jatò for professional treatments combined with targeted home cosmetic products. It is an **innovative solution** for **impure, seborrheic** and **asphyxiated skin, prone to acne**, with signs of excessive and altered sebum production and possible formation of obstructive comedones and perifollicular cutaneous manifestations.

Clinically tested effectiveness*

RESULTS OF THE CLINICAL AND INSTRUMENTAL MEASUREMENTS PERFORMED ON VOLUNTEERS **

SEBUM	up to -52 % average -28 %
TEWL (TRANS EPIDERMAL WATER LOSS)	up to -40 % average -22 %
ERYTHEMA INDEX	up to -24 % average -17 %
COMEDONE VISIBILITY	-60 %

POSITIVE OPINION EXPRESSED THROUGH SELF-ASSESSMENT QUESTIONNAIRE ***

85 %	SEBUM REDUCTION
80 %	SKIN IMPERFECTIONS LOOK MINIMISED
85 %	SMOOTHER AND EVEN-LOOKING SKIN
90 %	REDUCED REDNESS FROM BREAKOUTS
55 %	MATTE, LESS SHINY SKIN
60 %	REDUCED VISIBILITY OF DILATED PORES

* Home products tested: PROCEUTIC Purity Action serum and Purity Action cream.

** Clinical results on tests conducted on 20 volunteers, aged 14 to 40, with impure, seborrheic and acne-prone skin for a 4-week period, twice a day.

*** % of the volunteers (20) who expressed a positive opinion after a 4-week period of treatment, twice a day.

Functional Substances

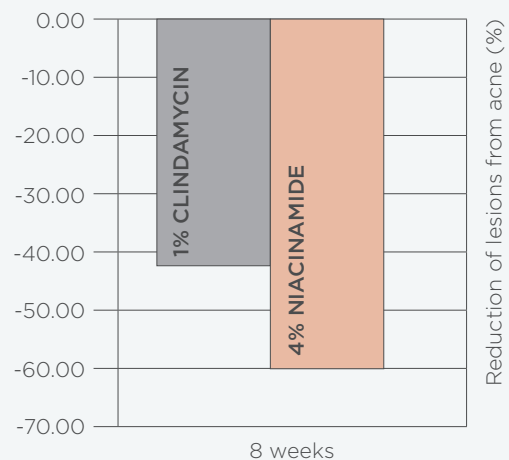

Niacinamide

Niacinamide belongs to the family of B vitamins. It is also known as **vitamin B3**, PP, or Nicotinamide.

Traditional antimicrobials used to treat acne can cause irritation and bacterial resistance (9)*. A study has shown how 4% of Niacinamide has a similar **effectiveness** to 1% of clindamycin (antibiotic) in treating acne. The appearance of acne is reduced by 60% with Niacinamide and 43% with clindamycin (10)*.

Other effects of Niacinamide are the reduction of surface sebum visibility, hyperpigmentation spots, redness, wrinkles, and fine lines (11)* (12)*.

NIACINAMIDE IN REDUCING THE APPEARANCE OF ACNE

Reduction of lesions from acne (papules and pustules) in 76 subjects with acne after applying a gel with 4% Niacinamide or with 1% clindamycin twice a day for 8 weeks (10)*.

Bakuchiol

The threat of bacterial resistance to antibiotics used traditionally to treat acne has led to an increased interest in **natural substances** with antimicrobial activity and action mechanisms that differ from antibiotics. Bakuchiol, extracted from seeds of the Psoralea plant species, is one of these plant-derived substances. In both in vitro studies and human experiments, this widely documented **broad-spectrum antimicrobial** and **anti-inflammatory agent** has shown its ability to inhibit the growth of the bacteria responsible for acne and to significantly reduce inflammation (13)* (14)*.

Boswellia Extract

Numerous studies have shown the pharmacological properties and **effectiveness** of Boswellia Serrata in reducing oxidative and inflammatory damage (15)* (16)*. Lately there has been a lot of focus in dermatology on the **anti-inflammatory functions** of boswellic acids derived from Boswellia. Both in vitro and in vivo studies have confirmed how these acids act on the various mechanisms involved in the development and persistence of inflammatory processes (17)*.

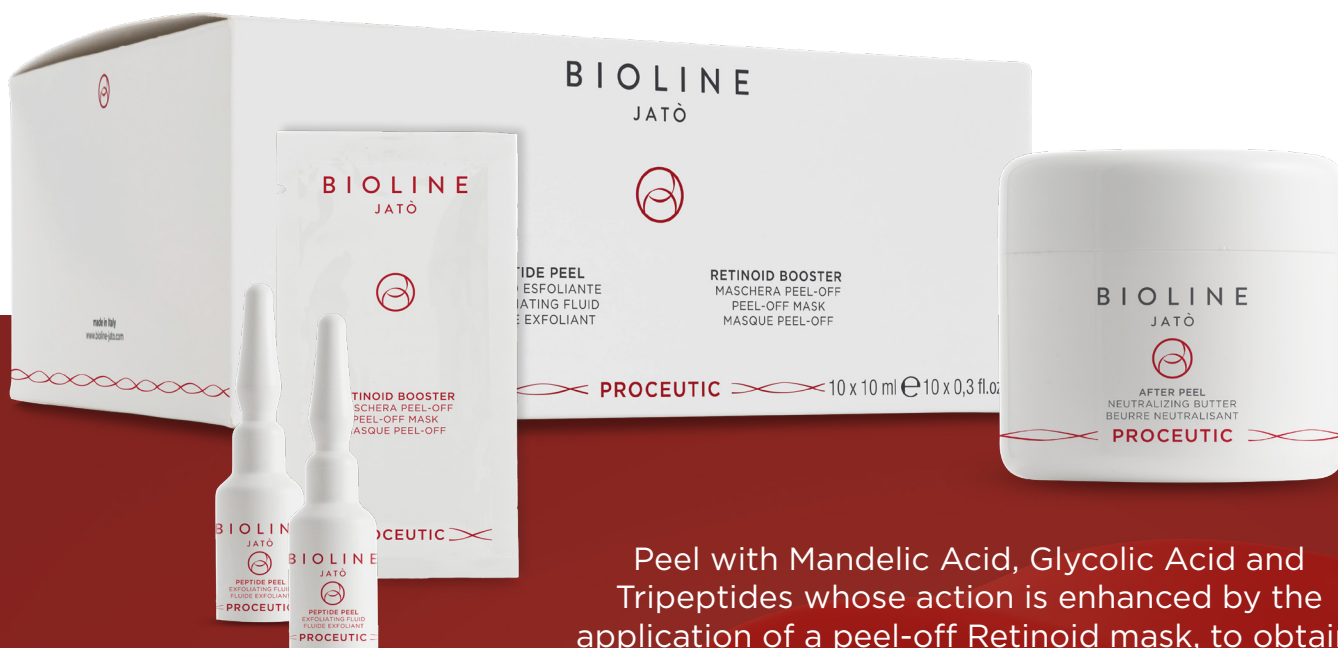

BIOLINE JATÒ

Peeling and Neutralizers

THE AGEBIOTIC SYSTEM

Professional treatment with Retinoids
+ AHA 30% pH3

Peel with Mandelic Acid, Glycolic Acid and Tripeptides whose action is enhanced by the application of a peel-off Retinoid mask, to obtain, in total safety, an effectiveness comparable to that of a peel with a lower pH. It reduces the visibility of deep wrinkles and dark spots.

RETINOID SKIN REGENERATION PEEL - PROFESSIONAL PRODUCTS

PEPTIDE PEEL EXFOLIATING FLUID

Mandelic and Glycolic Acid, Tripeptide-38, Tripeptide-8
10x4 ml

Visible epidermal renewer that combines the brightening and smoothing power of Alpha Hydroxy Acids with the redensifying properties of Biomimetic Tripeptides.

RETINOID BOOSTER PEEL-OFF MASK

Retinaldehyde, Retinol, Bio-retinol
10x10 ml

Three different forms of Vitamin A and an advanced delivery technology regenerate the skin, minimizing the appearance of wrinkles and dark spots.

AFTER PEEL NEUTRALIZING BUTTER

Shea Butter, Rice Bran Oil, Vitamin E
150 ml

An essential step to neutralize acids, balance the pH and soothe the skin. A highly nourishing and restorative butter formulation which brings comfort and intense relief to the skin, restoring the proper moisture balance. Ideal for mature, devitalized and dehydrated skin.

THE PURITY SYSTEM

Professional treatment with 9 herbs
+ AHA-BHA 30% pH3

Powerful synergy between a natural peel consisting of nine herbal extracts and an exfoliating booster gel based on Alpha and Beta Hydroxy Acids, to obtain, in total safety, an effectiveness comparable to that of a peel with a lower pH. Specific for impure and seborrheic skin prone to acne.

PURITY HERBAL PEELING - PROFESSIONAL PRODUCTS

9 HERBS POWDER

DUAL ACTION EXFOLIATOR

Willow Extract, Papain, Red Vine Extract
10x10 g

A selection of natural active ingredients visibly regenerates and deeply purify the skin.

α & β PEEL

EXFOLIATING BOOSTER GEL

AHA Complex, Sodium Salicylate, Azelaic Acid
10x15 ml

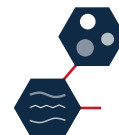

A balanced combination of Alpha and Beta Hydroxy Acids with exfoliating and normalizing action, which visibly renews the skin.

AFTER PURITY PEELING

NEUTRALIZING CREAM

Distilled Chamomile Water, Capryloyl Glycine, Jojoba Oil
150 ml

An essential step to neutralize acids, rebalance the pH and deeply cleanse the skin, gently removing excess oiliness. The fresh and creamy texture gives an instant sensation of relief. Ideal for impure, seborrheic and asphyxiated skin.

Cleansing and Regenerating

PROFESSIONAL AND HOME PRODUCTS

CLEAN BIOTIC FACE & EYES DELICATE CLEANSER

Prebiotics (Inulin and Alpha-Glucan Oligosaccharide), Distilled Witch Hazel Water, Panthenol

200 ml PROFESSIONAL PRODUCT

100 ml HOME PRODUCT

Multi-active 3-in-1 face and eye cleanser, removes make-up and deeply cleanses the skin while respecting its physiological pH. Ideal for all skin types, even the most sensitive and dehydrated.

SOS RECOVERY CREAM

Dipotassium Glycyrrhizate, Centella Extract, Prebiotics (Inulin and Alpha-Glucan Oligosaccharide)

150 ml PROFESSIONAL PRODUCT

50 ml HOME PRODUCT

Facial formula with high tolerability. Reinforces skin sensitized after dermo-aesthetic treatments such as laser and chemical peels. Comfortable and lipid-restoring, it creates a barrier on the surface of the skin, protects the microbiota and maintains an optimum level of hydration.

OXI-GEL DUAL ACTION CLEANSER

Hydrogen Peroxide, Burdock Extract, Arnica Extract

200 ml PROFESSIONAL PRODUCT

100 ml HOME PRODUCT

Purifying 2-in-1 facial cleanser with intensive action. The original composition, enriched with Hydrogen Peroxide, makes it ideal for impure, oily and hyperkeratotic skin types.

Serum and Cream

HOME PRODUCTS

AGEBIOTIC SERUM

Cyclopeptide-5, Vitamin C 2.0, Isoquercetin
30 ml

Ultra-concentrated face serum that minimizes the visibility of deep wrinkles. It donates a revitalized and more compact look, giving the facial features a smoother and more relaxed appearance.

AGEBIOTIC CREAM

Biotech Filler, Prebiotics (Inulin and Alpha-Glucan Oligosaccharide), Vitamin C 2.0
50 ml

Facial formula with intensive action. Reduces the visibility of deep wrinkles and expression lines for a more even-looking complexion. Redefines and promotes compactness of the skin for a firmer-looking face.

PURITY ACTION SERUM

Niacinamide, Bakuchiol, Prebiotics (Inulin and Alpha-Glucan Oligosaccharide)
15 ml

Face formula with rapid action. A powerful combination of active ingredients with keratolytic properties that improves the appearance of localized skin imperfections, clogged pores and excess sebum.

PURITY ACTION CREAM

Boswellia Extract, Dipotassium Glycyrrhizate, Prebiotics (Inulin and Alpha-Glucan Oligosaccharide)
50 ml

An active face texture for an immediate matifying effect. Improves the appearance of oily skin prone to excess sebum, reinforces the skin's natural defenses and promotes its barrier function. Recommended for impure, seborrheic and asphyxiated skin, even in adulthood.

Retinoid Skin Regeneration Peel

Mature skin with deep wrinkles and dark spots

PROFESSIONAL TREATMENT

Skin type	mature, with deep wrinkles and dark spots, hyperkeratotic, and not very sensitive
Frequency	one treatment per week; cycle of 3/4 treatments

COMBINED APPLICATION

PHASE 1

❗ **Before starting the treatment: lower down the backrest of the treatment table and place a rolled-up towel under the client's neck so that it is fully extended, to make it easier to apply and remove the subsequent mask.**

- **Clean Biotic face & eyes delicate cleanser:** apply the product on two damp cotton pads and cleanse the eyes, face, neck and décolletage.

- Rinse with water to remove any residue.

PHASE 2

- **Peptide Peel exfoliating fluid:** cover the eyes with cotton pads soaked in water and, using a fan-shaped brush, apply the product evenly over the face, neck and décolletage.

❗ **Do not remove the product.**

PHASE 3

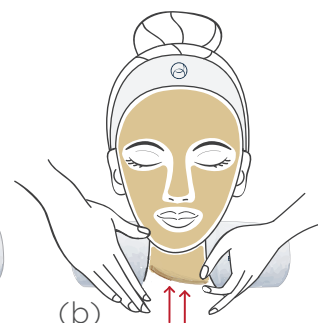

- **(a) Retinoid Booster peel-off mask:** apply the product evenly using a brush, in a thin layer **on top of the exfoliating fluid.**

- Leave on for 25-30 minutes, until the mask looks dry.

❗ *Stop application if there are signs of excessive discomfort and/or burning.*

- **(b)** Take off the mask by gradually rolling it upwards.

- Remove any residue with a cotton pad soaked in water.

THE AGEBIOTIC SYSTEM

Professional treatment with Retinoids
+ AHA 30% pH3

The Agebiotic System involves the use of professional treatments along with specific home products. The Proceutic line was formulated to ensure maximum tolerability on skin treated in the salon or made fragile by dermo-cosmetic treatments and, therefore, the application of any other home product is not recommended.

PHASE 4

- **After Peel neutralizing butter:** with your hands, apply 4 ml of product on the face, neck and décolletage and massage for a few minutes.
- Remove the product with cotton gloves.

PHASE 5

- **SOS Recovery cream:** apply 5 ml on the face, neck, and décolletage.
- Leave on for 5 minutes, then massage gently until absorbed.

BEFORE TREATMENT

- 1 Identify the skin type and fill out the PROCEUTIC consultation sheet, paying special attention to the warnings
- 2 Inform the customer of the characteristics of the treatment, the possible skin reactions, the sensations perceived and their evolution

DURING TREATMENT

- 1 Strictly follow the indicated treatment protocol
- 2 Monitor the customer for the entire duration of the treatment and report any reactions on the consultation sheet

AFTER TREATMENT

- 1 Provide the home products and inform the customer of the use methods and precautions

Retinoid Skin Regeneration Peel

Mature skin with deep wrinkles and dark spots

PROFESSIONAL TREATMENT

Skin type	mature, with deep wrinkles and dark spots, thin and hypersensitive
Frequency	one treatment per week; cycle of 3/4 treatments

DISSOCIATED APPLICATION

PHASE 1

❗ **Before starting the treatment: lower down the backrest of the treatment table and place a rolled-up towel under the client's neck so that it is fully extended, to make it easier to apply and remove the subsequent mask.**

- **Clean Biotic face & eyes delicate cleanser:** apply the product on two damp cotton pads and cleanse the eyes, face, neck and décolletage.

- Rinse with water to remove any residue.

PHASE 2

- **Peptide Peel exfoliating fluid:** cover the eyes with cotton pads soaked in water and, using a fan-shaped brush, apply the product evenly over the face, neck and décolletage.

- Leave on for 8-10 minutes, then remove the product with cotton pads soaked in water.

❗ *Stop application if there are signs of excessive discomfort and/or burning.*

PHASE 3

- **After Peel neutralizing butter:** with your hands, apply 4 ml of product on the face, neck and décolletage and massage for a few minutes.

- Remove the product with cotton gloves.

THE AGEBIOTIC SYSTEM

Professional treatment with Retinoids
+ AHA 30% pH3

The Agebiotic System involves the use of professional treatments along with specific home products. The Proceutic line was formulated to ensure maximum tolerability on skin treated in the salon or made fragile by dermo-cosmetic treatments and, therefore, the application of any other home product is not recommended.

BEFORE TREATMENT

Purity Herbal Peeling

Impure, seborrheic, and acne-prone skin

PROFESSIONAL TREATMENT

Type of skin	Impure, seborrheic, and acne-prone skin
Frequency	one treatment per week; cycle of 3/5 treatments

PHASE 1

- **Clean Biotic face & eyes delicate cleanser:** apply the product on two damp cotton pads and remove eye makeup.
- **Oxi-Gel dual action cleanser:** distribute the product over the face, neck and décolletage and massage it with damp fingertips.
- Rinse with water to remove any residue.

PHASE 2

- **9 Herbs Powder dual action exfoliator and α & β Peel exfoliating booster gel:** pour the two products into a bowl and mix them with a spatula until an even-looking consistency is obtained.
- Cover the eyes with cotton pads soaked in water and apply the mixture evenly on the face and neck using gloves.

- To encourage the exfoliating action, massage with damp hands using circular movements.

PROCEUTIC

Complementary Products

During the day, after applying the specific PROCEUTIC cream, we recommend using **DE-SENSE CC CREAM COLOUR CORRECTOR SPF 30** for a protective and soothing action on the complexion. In the event of intense and prolonged exposure, we recommend using **SUNDEFENSE SPF 50+ FACE CREAM AGE PROTECTION**.

DE-SENSE CC CREAM
COLOUR CORRECTOR PENTAPEPTIDE SPF 30
Pentapeptide-59, Ginkgo Extract, Mineral Pigments
30 ml

The effectiveness of an active cream and the correcting effect of a CC cream. Protects, soothes, and minimizes skin imperfections. The skin takes on a universal tone and the complexion is even-looking thanks to its precious mineral pigments.

SUNDEFENSE
VERY HIGH PROTECTION SPF 50+
FACE CREAM AGE PROTECTION
UVA-UVB Filters, Hyaluronic Acid, Licorice Extract
50 ml

Multi-function sun cream that combines a latest generation UVA and UVB filter system with precious substances that defend the skin from damage caused by IR rays. Its "fast absorbing" formula moisturizes and nourishes the skin, protecting it from the harmful effects of the sun: dark spots, wrinkles, and laxity.

Tips

TO WHOM TO PROPOSE THE PROCEUTIC LINE

The Proceutic line can be proposed to:

- people over 40 who want to reduce the visibility of deep wrinkles and dark spots, not improved by previous treatments.
- people over 40 who undergo aesthetic medicine treatments as a complementary pre and post treatment action to maximize and prolong the results. In preparation for aesthetic medicine treatments with Retinoid Skin Regeneration Peel treatments and after aesthetic medicine treatments with The Agebiotic System home products.
- people over 15 years old with impure, seborrheic, and acne-prone skin to improve the general condition of the skin and reduce its imperfections.
- adults with asphyxiated and seborrheic skin, to improve the general condition of the skin.

EFFECTS AND RECOMMENDATIONS BEFORE TO USE

Treatments such as physical exfoliators, microdermabrasion, depilation and aesthetic lasers should not be performed up to a week before professional PROCEUTIC treatments. If the customer wears contact lenses, these must be removed before applying the product.

EFFECTS AND RECOMMENDATIONS AFTER USE

- After a PROCEUTIC professional treatment, your skin may feel warm, or it could be reddened, with greater sensitivity and become less supple. This sensation can last a few hours. It is normal and will disappear spontaneously.
- Cleaning and moisturizing the skin with PROCEUTIC products will help to alleviate any discomfort. However, it is advisable to use PROCEUTIC home products for at least 6 weeks.

- Normally the customer will not present with irritation or erythema. Even if no obvious exfoliation occurs, the product is actually working.
- No other exfoliation treatment should be performed on the treated area until 4 weeks after the last PROCEUTIC professional treatment or until the skin is completely recovered.
- It is recommended to avoid activities involving excessive sweating, skin overheating and prolonged contact with hot and humid environments (intense aerobic sports, sauna, steam room, or swimming pool...) in the days following the application of professional treatments.
- It is not recommended to carry out peeling procedures during the summer as the skin is very exposed to UV rays and dark spots may appear.

CONTRAINDICATIONS

Not recommended for use in people:

- with hypersensitivity to any substance in the PROCEUTIC formulas;
- with active dermatitis (Herpes Simplex);
- with mycosis and active inflammatory dermatoses;
- under treatment with photosensitizing drugs;
- with injured skin.

Contraindicated use of professional peelings in:

- who have undergone a medical skin rejuvenation procedure such as dermabrasion, laser, deep peeling or any cosmetic surgery in the last 6 months;
- pregnant women and people under 14 years of age.

STORAGE CONDITIONS

Store at room temperature (between 10°C and 25°C), in a dry place away from light and heat sources. Avoid mixing with different substances or products that are not required in the specific instructions.

WARNINGS

Use only as directed. Avoid contact with eyes, mucous membranes and ulcerations, if any. Only use the products listed on the treatment sheet. Avoid the use of Bioaromas/essential oils. Avoid direct exposure to ultraviolet rays (tanning lamps, sun); it is recommended that prior to exposure to the sun, users cover areas where AHAs have been applied with sunscreen with high sun protection factors. Contact of the product with the skin must be of limited frequency or duration (see Professional Manual). Do not treat individuals undergoing treatment with products made with Retinic Acid. If necessary, wait 15 days after stopping the use of said products before you begin a cycle of PROCEUTIC treatments. Do not apply

to injured skin or oedemas. Should prolonged redness develop after use, discontinue application. If irritation persists, discontinue use and consult a physician. Do not use on newborns or children. Before use, people with sensitive skin should undergo a patch test. In case of eye contact, rinse thoroughly under running water. No hazard under normal conditions of use. Not to be ingested. Keep out of reach of children. For external use only.

! *Any slight olfactory or colour changes are due to the presence of functional substances of natural origin, AHA and do not alter the cosmetic function of the product.*
